About THE KINGSWOOD COMPANY

For over 65 years, The Kingswood Company has been the **leading innovator in high-quality, private-label jewelry care products**. Today, we bring you superior customer service, sophisticated packaging that will define your brand, and private-label jewelry care products that are unparalleled in look and function. In fact, we were chosen by COUTURE, the premier trade show for luxury jewelry and timepieces held annually in Las Vegas, as the exclusive jewelry cleaner of the event and the sponsor of the Sparkle + Shiner® Lounge.

When you place your logo on our elegant jars and polishing cloths, you create a product that gets noticed by your customers. With many combinations of formulas, jar and lid colors, and polishing cloth and ink colors, each jar and polishing cloth we produce can be customized to best reflect your brand identity. Also, our **unique focus on jewelry care education** allows us to assist you and your team in teaching your customers how best to care for their cherished jewelry.

Global industry provider

COUTURE

Why Choose Private Labeling

A Private-Label Jewelry Care Line can:

- **Enhance your brand** with an elegant line of products that emphasizes your quality and sophistication.
- Represent a unique offering that is **exclusive to you**, and only available in your retail environment.
- Help your sales associates **build better relationships** with their clients through jewelry care education.
- **Impact your bottom line** through add-on sales and repeat business.
- **Bring referrals.** When your customers wear their clean, beautiful jewelry from you, it is a magnet for the coveted question, “I love your ring, where is it from?”

Why Choose THE KINGSWOOD COMPANY

Companies of all sizes and types choose The Kingswood Company for their private-label jewelry care line. Our customers range from: retailers and distributors to manufacturers and designers; national chains to independent retailers and internet storefronts; and luxury brands to discount retailers.

These companies choose us for these reasons:

- Our **unparalleled customization options** that allow you to design a product unique to your brand
- Our thoroughly tested trade-secret formulas that ensure professional cleaning results
- Our long-standing history as the leader in jewelry cleaning and care products

Liquid Jewelry Cleaners

Fine Jewelry Cleaner

Ideal for diamonds

- Best-selling trade-secret formula
- Lightly scented with lavender

Best Used On: Fine gold and platinum jewelry, as well as harder gemstones such as diamonds. Do not use on pearls or other porous gemstones.

Gentle Jewelry Cleaner

Safe for most gemstones and metals

- Ammonia-free
- Light gardenia scent

Best Used On: Most varieties of delicate and porous gemstones including emeralds, pearls, opals, and turquoise. It is also gentle enough for fashion jewelry.

Silver Jewelry Cleaner

Gently removes light tarnish

- Mild formula safely removes light tarnish without pitting or silver loss
- For use on sterling silver only
- Pleasant lavender scent

Best Used On: Fine silver jewelry without any set stones or designer antiquing. Do not use on gold, pearls, coral, turquoise, malachite, or other porous stones.

Ways to Incorporate Into Your Business

Retail Point-of-Sale

Positioning your line at your cash wrap encourages deeper conversations and stronger relationships with your customers.

Website & E-Commerce

Expand awareness and purchases of your professional jewelry care line by offering it for purchase on your website.

Jewelry Care Education

Position yourself as a jewelry care expert by informing, educating, and encouraging your customers to clean and care for their jewelry.

Gift With Purchase

Create positive experiences for your customers and increase the likelihood of return visits with gift bag or gift with purchase items.

Customer Service

Your jewelry care products can be used to recognize a significant purchase, or to help your customer service staff improve or cement a customer relationship.

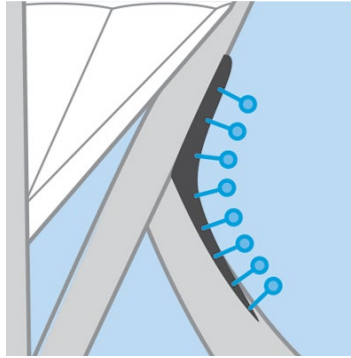

Cleaning vs. Disinfecting

Care and cleaning has never been more important, and will always be relevant to your customer.

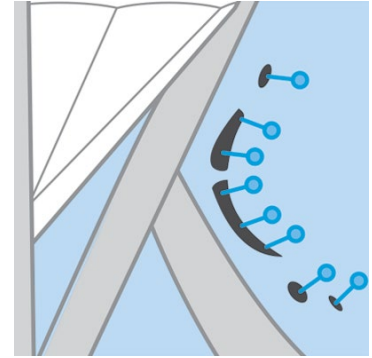

How does jewelry cleaner work?

Surfactant cleaning molecules are attracted to oils, dirt, and grime on jewelry.

When the jewelry soaks, the surfactants attach to the oils and grime.

The surfactant molecules remove the debris, leaving jewelry sparkling like new.

Frequently Asked Questions

Q: What is the difference between cleaning and disinfecting?

A: Cleaning: Refers to removing dirt and germs from surfaces (not EPA regulated; FDA regulated depending on surface)

Disinfecting: Refers to killing germs on surfaces and normally has a “dwell” time (EPA & FDA regulated)

Q: Does the Ultrasonic remove germs?

A: For the common metals and gemstones, along with other personal items, that can be cleaned by an ultrasonic, adding a surfactant cleaner to the water provides an extra thorough cleanse.

Q: Is jewelry cleaner a disinfectant?

A: No. Jewelry cleaner is considered a cleaner, but it removes germs rather than kills like disinfectants.

Q: Can I just use alcohol-wipes to clean the jewelry?

A: Alcohol can damage and dull stones, which is why using a jewelry cleaner is always a better option.

CLEAN + CARE®

In-stock and retail-ready products make building your jewelry care line easy

CLEAN + CARE® is designed and produced by The Kingswood Company, using the same industry-leading jewelry care formulas, but in multiple ready-to-use, sleek packaging styles.

While our focus and dedication to private labeling spans the majority of The Kingswood Company's history, CLEAN + CARE® was created to **allow jewelers of all sizes to have access to quality jewelry care products.**

If you need a jewelry care solution that processes and ships in 1-5 business days, this is the line for you. From retail-ready products to bulk in-store cleaning, we offer a wide range of jewelry care products.
